OSCP+ and Security+ certified Computer Science graduate bridging offensive security and defensive engineering, with a Fortune 100 SOC internship, hands-on production AppSec across tenant isolation, OAuth hardening, and SSRF defense, plus original open-source offensive tooling and daily work triaging alerts in Splunk and Microsoft Defender.

PROFESSIONAL EXPERIENCE

Web Systems & Automation Engineer | *Posted Social* | St. Louis, MO — Feb 2026 - Present

- Built and secured a multi-tenant client portal in Next.js and TypeScript on Supabase and Vercel for 50+ clients and 100+ users, owning the full technical and security side.
- Enforced tenant isolation at the database layer with Postgres Row-Level Security (RLS) and tiered RBAC, with passwordless sign-in scoped to each client's email and domain.
- Hardened the OAuth account-linking flows against forgery with server-signed state and PKCE, added a server-side SSRF egress guard, and kept secrets server-side in Supabase Vault.
- Automated 30+ workflows across 20 client environments with Python integrations to the Meta and platform APIs.

Cybersecurity Intern, SOC | *Publix Supermarkets Corporate* | Lakeland, FL — May - Jul 2025

- Triaged 200+ security alerts across Microsoft Defender EDR and ServiceNow at a Fortune 100, writing Splunk SIEM queries that confirmed real incidents and cleared false positives.
- Tuned SIEM thresholds and Defender detection logic to cut false positives, saving $10K+ a year in analyst time.
- Extended a PowerShell domain-monitoring tool with SSL certificate and WHOIS analysis that flagged fraudulent lookalike domains and widened external threat coverage by 50%.
- Supported red-team engineers on Active Directory enumeration, Kerberoasting validation, and privilege-escalation testing mapped to MITRE ATT&CK, and performed E01 forensic imaging.

IT Support Technician | *Florida Southern College* | Lakeland, FL — Oct 2022 - Dec 2025

- Resolved Tier 1 tickets for 100+ students and faculty at a 95% first-attempt rate, from account lockouts to MFA and password recovery, each fix explained in plain terms.

CERTIFICATIONS

- **OSCP+ (Offensive Security Certified Professional), 2025**
- **CompTIA Security+, 2025**
- AZ-900 (Microsoft Azure Fundamentals), 2024
- SC-900 (Microsoft Security, Compliance, and Identity Fundamentals), 2024
- Google Cybersecurity Professional Certificate, 2024

PROJECTS & PUBLICATIONS

Relay, Open-Source Secure Multi-Tenant Portal + Security Lab: An open-source twin of the production portal I built end to end with Claude Code, with a live Security Lab of three attack and defense demos, tenant isolation with Postgres Row-Level Security, OAuth state-forgery defense, and a server-side SSRF guard (relay.vladimircuc.com).

Self-Study Malware Analysis Lab: An isolated FLARE VM and REMnux lab where I analyzed a real AsyncRAT sample end to end, static analysis with dnSpy and Detect It Easy and dynamic analysis with Process Monitor and Wireshark to surface process injection, command-and-control, and registry persistence, written up on my Medium (medium.com/@vladimircuc007).

RaptorRecon & DragonMap, Open-Source Offensive Tooling: Bash frameworks I wrote to automate multi-target reconnaissance and credentialed Active Directory enumeration over SMB, RPC, and LDAP, surfacing misconfigurations and access-control gaps in assumed-breach scenarios (github.com/vladimircuc).

TECHNICAL SKILLS

Offensive Security: OSCP+, Active Directory Attack Paths, Kerberoasting, Lateral Movement, Privilege Escalation (Linux/Windows), Web Application Testing, OWASP Top 10, Buffer Overflow, Burp Suite, BloodHound

Security Operations & Detection: Microsoft Defender EDR, Splunk SIEM (SPL), MITRE ATT&CK, Alert Triage, Incident Response, Log Analysis, Forensic Imaging (E01), KQL, YARA, Sigma

Application & Cloud Security: Postgres Row-Level Security, OAuth Security, PKCE, SSRF Defense, RBAC, Secrets Management, Azure (AZ-900), Identity & Access Management, Conditional Access

Languages & Automation: Python, Bash, PowerShell, Java, C++, JavaScript, TypeScript, SQL, Regex, Git, Next.js, Linux

EDUCATION

Bachelor of Science in Computer Science | Florida Southern College | GPA: 3.8 / 4.0 — December 2025
